

CompAir's new Mobilair 100 model will deliver up to 10,2 m<sup>3</sup>/min at 7 bar.

## On-site and light compaction

Towerlight's VT-1 lighting tower. The company also now sells pumps.

On-site equipment includes rental perennials such as generators, compressors and lighting towers. A major player in this sector, of course, is Atlas Copco, which will display its newly designed, portable QAS 125-150 mid-range generators and XA S 296-446 mid-range compressors. Also moving air is CompAir. It has given the TurboScrew range new, electronic control systems and Cummins Stage III-compliant engines. Last, but not least, of compressor mentions is Kaeser of Germany. The Mobilair 100 model, powered

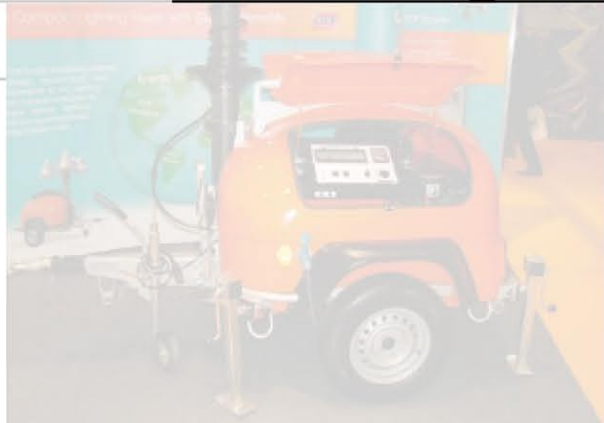

by a 71,7 kW Kubota engine, will deliver up to 10,2 m<sup>3</sup>/min at 7 bar.

New generators will be on show from Belgium's Europower. You can see the company's first generator, the EP7000Ei, with the new Honda iGX440 11,5 kw engine. The company says the rental market will be particularly interested in the new EPS40TDE, which has a water-cooled 4 cylinder 3,3 litre

Belgian generator specialist Europower will show the new EPS40TDE genset, among others.

The EcoLite mobile tower offers operating cost reductions up to 75%, says TCP.

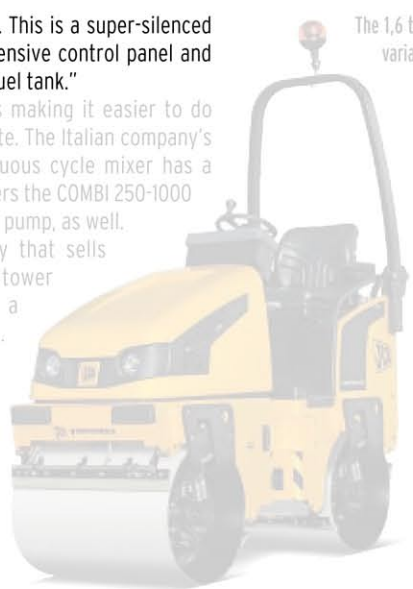

Kubota turbo diesel engine. This is a super-silenced generator with a "very extensive control panel and is provided with a banded fuel tank."

Elsewhere, Imer Group is making it easier to do several things on the job site. The Italian company's new, 78 kg Spin 15 continuous cycle mixer has a 18 l/min capacity, and it offers the COMBI 250-1000 tile saw and STEP 120 screw pump, as well.

Towerlight, the company that sells a wide range of lighting tower products, also now has a range of pumps to market. A selection of these will be shown on its stand.

The UK's Taylor Construction Products says the 0,6 l/hr fuel consumption rate of its 750 kg EcoLite mobile light tower offers operating efficiencies of about 75%.

The 1,6 t JCB Vibromax VMT160 is available in five variants.

Caterpillar's 1,5 t CB14 tandem roller replaces the CB-1113 and CB-114 models. Available in four variants, buyers have the choice of a 900 mm or 1 m drum.

Hamm is adding the HD 10, HD 12 and HD 13, spanning 1,5 to 4,2 t and bringing its HD range to 10 models. The German company is building on the success of its HD8, having sold approximately 700 units, about 80% to rental companies, since introduction last year at Intermat.

Swiss company Ammann offers the new Rammax 2,1 t, 30 kW, single-drum, ride-on RW 1805-SPT trench roller, which replaces the RW

## Handle Anything. The New 633GC.

The New 633GC combines all the breakthrough functional advantages of our original gas saw with more than enough power to do the job and the reliability to keep you in the cut longer.

### BE UNSTOPPABLE.
